

# FM2000 Portable Security

Rapid deployment  
GSM remote alarm signalling  
Manual or timed arm / disarm  
Remote management via  
Upload / download  
Operates from mains or battery

## FM2000 Portable Alarm Controller

Developed for the UK Police forces, the FM2000 enables a security system to be set up at a moments notice, anywhere in the world. For Intruder detection, personnel or property protection the FM2000 meets all these needs. Can be supplied together with 24/7 monitoring and man guard response, on a rental basis.

- Rugged construction and truly portable
- Rapid deployment typically 5 minutes to activate
- Location of an incident is pinpointed. (64 alarm devices in 8 alarm zones)
- System can be armed and disarmed locally, remotely or by automatic timer.
- Automatic arm / disarm times can differ for specific dates.
- Remote dial in feature enables an Alarm Manager to monitor, interrogate and manage the systems functions and timers.
- All events are recorded in a down-loadable 500 event, time and date stamped log
- The precise location of the alarm is signalled via SMS to mobile phones and by GSM data to a 24/7 alarm receiving centre.
- Alarm receiving centre can dispatch a man guard to respond to an alarm.

## Applications

- Empty Buildings
- Construction sites
- Compounds
- Perimeter intruder detection
- Commercial storage outside buildings
- Dangerous areas for the public
- Sub stations
- Temporary and portable security
- Remote site security requiring Man Guard response.
- UK Police forces
- Personnel protection
- Event management
- Anywhere security is needed quickly

## Rental

This alarm panel is supplied ready to go with SIM card fitted on a straight forward monthly rental basis.

## Customer support

FM's service department supply the system configured to your requirements and provide a comprehensive alarm management support service.

## Security Guard response

We can also provide 24 / 7 alarm monitoring with man guard response.

## Wireless alarm Sensors

External PIR Detectors with various detection patterns.

The Twin-Eye dual beam external 30 metre detector provides high false alarm immunity.

Internal PIR's with a range of detection patterns, with pulse count & pet tolerant features.

Optical smoke detector.

Heat Detector for situations where periodic vacuuming the sensor is not practical.

Weatherproof transmitter with clean contact alarm inputs.

Internal door contact transmitter with integral reed contact + wired inputs.

Shock and movement sensor with sensitivity adjustment + N.C. Contact alarm input.

Pendant Panic button.

Remote controls for arming and disarming control
